

March 24, 2020

From everyone at Divestco Geoscience we hope that you and your family are coping with what is an unprecedented time in everyone's lives. The headwinds our industry is facing is unlike anything most of us have ever seen but we are confident that we all will come out of this, (bruised and battered) but stronger none the less.

For our friends and clients we would like to let you know that Divestco Geoscience has set up our staff to work remotely and that we are well equipped to deliver all the products and services that you have come to rely on. Our operating infrastructure has been tested and in place for some time now and we are confident we can provide uninterrupted services.

Our Geomatics, Seismic, Software, Data and support groups continue to be available during normal business hours through the same phone and email contacts you have used in the past. We welcome any questions or concerns you may have.

**If in the event you have found yourself recently unemployed than we would like to talk to you about how we can get you the tools you need to consult, do project work or even just stay current and engaged. Please contact us at [www.info@divestco.com](mailto:www.info@divestco.com) for details.**

Divestco Geoscience is a Calgary based company that is committed to supporting the people and companies that make up our great industry. If we can help in these trying times please reach out to your Divestco Service Representative.

Sincerely,

Lonn Hornsby, Sr. Vice President  
Divestco Geoscience Ltd.
